

Commercial Hot Water

A range to suit every application

BOSCH

Invented for life

Bosch 32 Series

The Bosch 32 Series gives you flexibility and reliability when there is a demand for large volumes of hot water. The 32 Series has all of your applications covered and is perfect for large homes. **Enjoy instant hot water when you need it!**

BOSCH 32

- ▶ Delivers up to 32 litres of hot water per minute
- ▶ Natural or LP Gas
- ▶ Internal* and external installations
- ▶ 5 year warranty on heat exchanger (part only)
- ▶ 2 year warranty on full parts and labour

The BOSCH 32Q has all the features of the 32, PLUS...

- ▶ When used on a ring main, an internal pump circulates water around your house to give you hot water at your taps when you need it
- ▶ Main Remote Controller included as standard

*Internal 32 Series requires flueing.

Bosch Manifold Systems

Bosch 32 models (KM3211WHNG/LP) have the ability to be linked in series (manifolded). For 2 units, the quick connection cable (KMQC0703339) can be used to allow the units to share the work load. 3 to 6 units can be used in rotation with a fully electronic rotation manifold system controller (KMSC201). The system controller allows the work load to be shared evenly between the manifolded units. Manifold Systems are ideal for commercial applications.

Note: When manifolding 2 or more Bosch 32 models, you are required to install a Main Remote Controller (RCM3211) for electronic staging.

The Bosch 32 Series is most effective when coupled with optional temperature controllers.

Main Remote Controller

RCM3211

- ▶ Time display
- ▶ Accurate temperature setting, e.g. 40°C
- ▶ Circulation mode (32Q only)
- ▶ Controller is standard with 32Q model

Sub-Controller

RCS3211

- ▶ Up to 3 temperature controllers can be fitted to the 32 and 32Q, i.e. 1 Main Remote Controller and 2 Sub-Controllers

Bosch Professional Packs

Specifically designed for commercial use, Bosch Professional Packs are suitable for applications that require a large volume of hot water for peak demand. All Bosch Professional Packs come with the following components – Bosch hot water system, Bosch-Everlast stainless steel storage tank, built-in thermostat, shroud, PTR valve and pump. They are pre-assembled, ready to be installed and can be shipped directly to site. This means an easy installation and low set-up cost.

DID YOU KNOW?

No assembly of Professional Packs is required – just connect to water, gas and electricity and the Bosch Professional Packs are ready to go!

- 1. Model C31532WHNG**
(without shroud; vent cap KMVC-100 as shown is a required accessory for external installations)
- 2. Model C31532WHNG**
(with shroud)

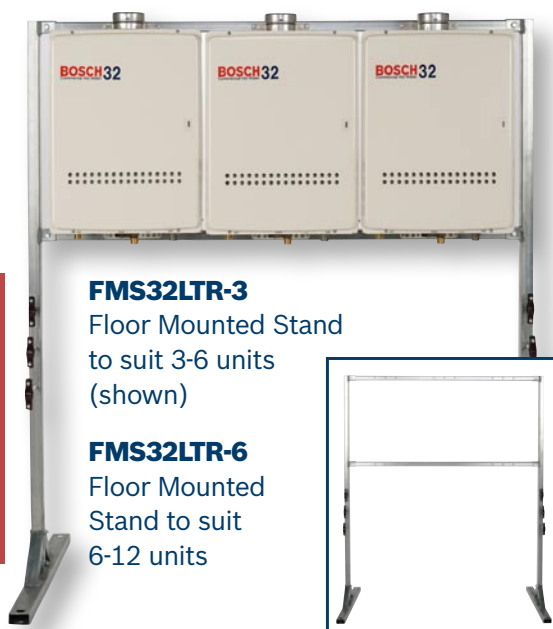

Bosch Commercial Stands

The Bosch range of Commercial Stands are an easy-to-assemble solution for mounting your Bosch 32 Series Commercial hot water systems. The stands are available in either floor or wall mounted frames and can accommodate up to 12 commercial hot water units.

FLOOR MOUNTED

WALL MOUNTED

FMS32LTR-3
Floor Mounted Stand
to suit 3-6 units
(shown)

FMS32LTR-6
Floor Mounted
Stand to suit
6-12 units

WMS32LTR-3
Floor Mounted Stand
to suit up to 3 units
(shown)
