

The Bosch - Audi R10 TDI Project

For many years, the Bosch name has been associated with high-profile brands in the development of new and modern technologies – like the Bosch Audi R10 TDI project.

Most of the partners involved in the Audi R10 TDI project have already been working successfully with Audi Sport for many years – several since the start of the "original quattro" project at the beginning of the 1980s.

Bosch has played a particularly important role. As was the case with the direct fuel injection TFSI, which was developed by Audi and Bosch together, Audi Sport and Bosch continue their cooperation for the Audi R10 TDI project. The V12 TDI engine management is performed by the Bosch Motronic MS14. The latest generation Common Rail System also originates from Bosch.

Their input is not limited to the engine: Bosch also helped create a completely new vehicle-data-logging system (FDE) for the race car.

Clear Vision Day and Night

Choose **Bosch Wiper Blades** and see the difference

"When competing in the V8 Supercar Championship clear vision is imperative for success, which is why I know I can rely on Bosch Wiper Blades.

No matter what the conditions, rain, hail or shine, Bosch Wiper Blades ensure I have a clear view of the road ahead in my Caltex Racing Falcon.

To win championships you need reliability and the best products. This is why I choose to use Bosch."

Russell Ingall
2005 V8 Supercar Champion

"As a Bosch stockist I am proud to be able to offer a quality product such as the Bosch Wiper Range. It's a product that you can sell with confidence and customer satisfaction is guaranteed.

We have a lot of customers who specifically ask for Bosch wipers because they are easy to fit, are of a high quality and represent good value for money.

We thoroughly endorse this product and we recommend Bosch wipers to all of our Trade & Retail Customers."

Gordon Hill
Owner/Manager
Autopro Gawler Pty Ltd

"We at Kingston Garage recommend the new Bosch Micro Edge Blades, the new standard in wiper blade technology, because

- they are easy to fit
- they perform as well as, if not better than OEM
- they are price competitive for a quality product
- customers notice the improvement and actually take the time to comment.

Customer satisfaction is important to business and positive customer feedback is our best measure of a great product."

Ross Hallett
Managing Director

- Advanced technology
- Clearer, safer vision
- Care for your customers
- Better performance and satisfaction
- Premium quality, affordable price

The Bosch Micro Edge Range

Revolutionary Bosch Micro Edge Wiper Blade technology brings a new level of wiper performance and quality to the replacement wiper blade market.

The latest in Bosch's long history of innovation in the automotive aftermarket, the Micro Edge Wiper Blade offers exceptional quality, innovation, safety and genuine value for money.

The clearly branded and numbered range makes wiper blade selection quick and easy and there's a wiper blade model to fit nearly all vehicle models on Australian and New Zealand roads. Each pack immediately identifies the type of blade, shows a clear view of the product, highlights the part number, applications, advantages and how to fit.

Bosch Micro Edge Wiper Blade Refills also available

Which blade to choose?

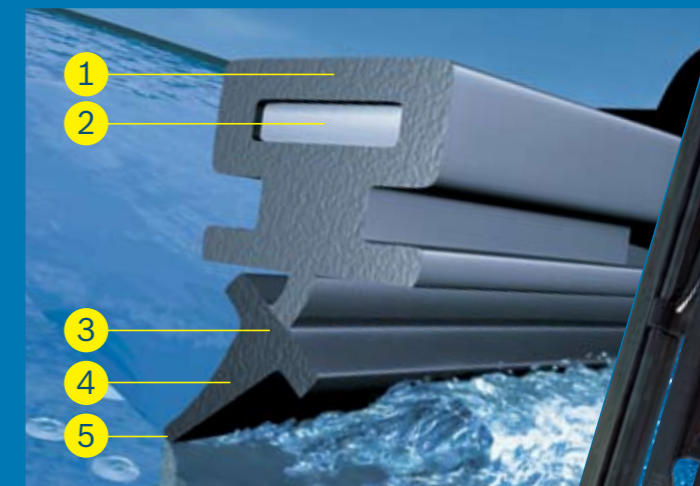

This clearly laid out chart (featured on the rear of the wiper blade packaging) will help you select the correct Bosch wiper blade. For more comprehensive information consult your Bosch wiper blade catalogue.

Bosch brings you a technological edge

Bosch Micro Edge Wiper Blades feature a patented dual-rubber technology that maintains wiping edge flexibility at all temperatures for optimal function and performance.

- 1 Soft rubber wiper-spine ensures low noise and even sweep without chattering and squeaking.
- 2 Internal tension strip enables direct pressure on the wiping edge across the width of blade for improved moisture removal.
- 3 Hard rubber wiper lip ensures long lasting, consistent performance across the width of the blade.
- 4 Smooth graphite coating eliminates gaps and flaws in rubber edge for perfect cleaning.
- 5 Precision cut Micro Edge blade (to 1/100mm) gives superior contact to glass which ensures crystal clear visibility through your windscreen.

The Quick-Clip method

Bosch innovation has led to the creation of the new Quick-Clip method that enables Bosch Micro Edge Wiper Blades to be fitted to most vehicles.

Bosch Micro Edge Wiper Blades also come with a universal Quick-Clip adapter enabling quick and easy installation on a wide range of vehicle types.

It is the only system which fits both hook and prong wiper arm types without any additional adapters.

Simply hook wiper blade into wiper arm.

Pull wiper blade into the wiper arm recess.

Continue to apply pressure until the clip snaps into place.
