

Clear Vision Day and Night

Choose **Bosch Wiper Blades**
and see the difference

The Quick-Clip method

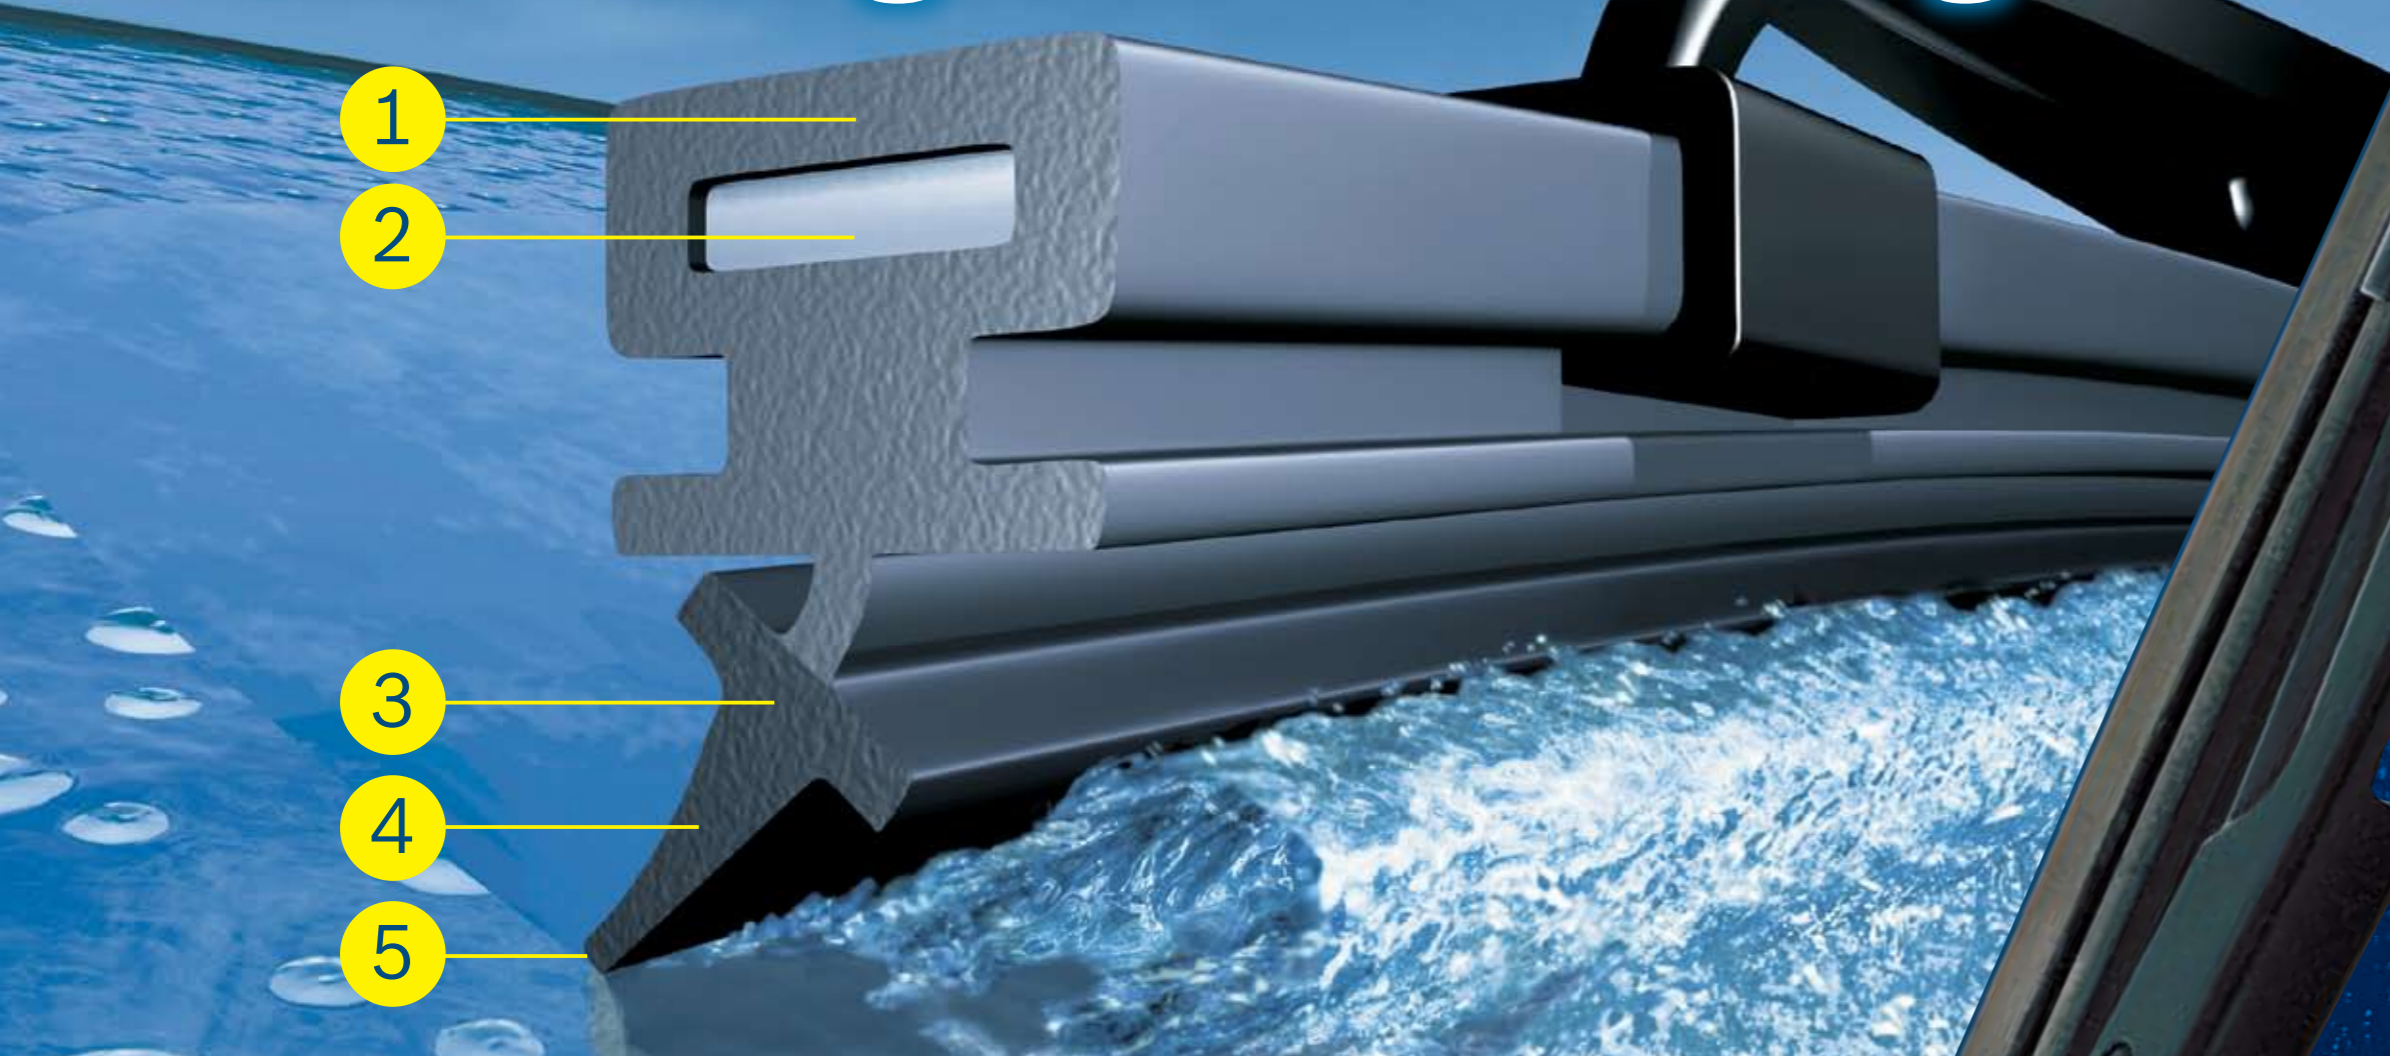

Simply hook wiper blade into wiper arm.

Pull wiper blade into the wiper arm recess.

Continue to apply pressure until the clip snaps in place.

Technological advantage

- 1 Soft rubber wiper-spine ensures low noise and even sweep.
- 2 Internal tension strip enables direct pressure on the wiping edge for improved moisture removal.
- 3 Hard rubber wiper lip ensures long lasting, consistent performance.
- 4 Smooth graphite coating eliminates gaps and flaws in rubber edge for perfect cleaning.
- 5 Precision cut Micro Edge blade gives superior contact to glass ensuring crystal clear visibility.

The new standard in wiper blade technology

The Bosch name

Stamped on every wiper blade is a guarantee of quality.

Internal tension strip

Applies direct pressure to the wiping edge for improved moisture removal.

Precision cut wiping edge

Precision cut edge to 1/100mm to remove the smallest droplets.

Aerodynamic solid steel frame

Gives maximum durability and ensures blade contact at all speeds.

Precision locked pressure joints

Enable precise control and extra frame stability.

Superior corrosion resistance

Galvanised metal frame and zinc dichromate primer coating.

Quick-Clip adapter for easy installation

Easy installation for over 85% of vehicle applications.

BOSCH

Invented for life
